

PITCH DECK · PRE-SEED INVESTMENT BRIEF · MAY 2026

The full *picture.*

A habit formation engine that uses the sensory pleasure of functional food as the behavioral anchor — for the 95M+ Spanish-speaking adults the wellness category never served.

Raising €140K on a post-money SAFE.

Standard European pre-seed terms. The SAFE avoids a full priced equity round today while giving early investors clear upside through the cap and discount when it converts at Seed. Valuation is driven by founder profile, product readiness, and market potential — not revenue metrics.

ROUND STRUCTURE

INSTRUMENT	Post-money SAFE
RAISE	€140,000
VALUATION CAP	€800,000
DISCOUNT	20% at Seed
IMPLIED DILUTION	~17.5%
USE OF FUNDS	18-month launch

"The risk is not 'can we build this' — the product is already built. It is 'can we launch and scale it the right way.' That is exactly what this round funds."

MOOD · SENSED

RECIPE · MATCHED

INDEX · MEASURED

HABIT · TRACKED

PLEASURE · REPEATED

Lasting habits form when anchored to *pleasure*, not willpower.

Food·Mood is a **habit formation engine** that uses the sensory pleasure of functional food as the behavioral anchor. Expert-curated psychobiotic recipes mapped to emotional state, guided 7–28 day transformation challenges, daily habit tracking, and a proprietary Food·Mood Index.

The mechanism is biological: when you eat the right food for your emotional state and enjoy it, you activate the reward circuit that makes you want to repeat it.

90% of serotonin is produced in the gut — the biological foundation of the gut-brain axis

No calorie counting. No guilt. No willpower required.

TAM

~95M Spanish-speaking women 45+

Every major wellness app is English-first or lacks the scientific depth for this life stage. No competitor has established a gut-brain nutrition brand in Spanish.

- Spain 11M
- LATAM 75M
- US Hispanic 9M

SAM

~10M paying-capable wellness users

Paid app penetration: ~20% Spain · 8–15% LATAM · ~25% US Hispanic (*Sensor Tower, 2024*)

SOM

2,500 challenges + 500 subscribers

~€116K ARR by month 18. The psychobiotics subcategory is a \$2.5B emerging segment — Food·Mood is positioned as its first Spanish-language consumer brand.

The window is *open* — and uncontested.

LATAM SMARTPHONE

70%+

Smartphone penetration in LATAM crossed 70% in 2024 — a digital wellness-ready audience.

APP SPEND · WOMEN 40+

+34%

Growth in app spending among women 40+ in 2023 (Sensor Tower) — and rising.

SPANISH GUT-BRAIN APPS

0

Every evidence-based gut-brain wellness app is English-only. Zero Spanish-language competitors.

EU REGULATORY EDGE

GDPR

Digital Health Act favours privacy-first European platforms. Psychobiotic research has matured.

*The window to become the *category-defining Spanish-language app* for women 45+ is open — and uncontested.*

Challenge-first acquisition → subscription retention.

Three revenue streams that reinforce each other: challenges drive the first payment, subscriptions capture the retained LTV, corporate contracts compress revenue per transaction.

UNIT ECONOMICS: Estimated LTV €150-200 · Target CAC <€40 · Conversion to subscription target 15% · Retention target 85% @ 3mo · 70% @ 12mo

No competitor at the *intersection*.

Spanish-language × gut-brain science × women 45+ — the market is fragmented between English-first trackers and generic wellness apps.

APP	LANGUAGE	GUT-BRAIN SCIENCE	WOMEN 45+	SPANISH MARKET	MODEL	€ / MO
Noom	EN only	✗	✗	✗	Subscription	\$60+
Lifesum	EN / multi	✗	✗	✗	Subscription	€4-9
MyFitnessPal	EN only	✗	✗	✗	Freemium	€10+
Yazio	EN / DE	✗	✗	✗	Subscription	€4-8
Elektra Health	EN only	△	✓	✗	Subscription	\$15+
Food·Mood	ES global	✓	✓	✓	Challenge + Sub	€7-9

UNCONTESTED INTERSECTION

Spanish · Gut-brain · 45+

No competitor offers gut-brain nutrition in Spanish for perimenopause/menopause. Elektra Health addresses symptoms but does not integrate nutritional science. *Food·Mood is the first.*

They proved the *category*. They left the beach *empty*.

Noom raised over \$657M and reached ~\$1B ARR by combining psychology, nutrition, and technology. They proved the category is massive — and proved where the model stops.

BUILT FOR ENGLISH-SPEAKERS WHO WANT TO LOSE WEIGHT

Noom

LANGUAGE	English-first
FOCUS	Weight-loss centric
PRICE	\$17–70 / month
COACHING	3,000+ human coaches (high fixed cost)
SCIENCE	Behavioural psychology (CBT)
CORE	Generic meal tracking

BUILT FOR SPANISH-SPEAKERS WHO WANT TO FEEL BETTER

Food·Mood

LANGUAGE	Native Spanish, globally — 95M women 45+
FOCUS	Emotional wellbeing — no scales, no calories, no guilt
PRICE	€7–9 / month — accessible across all Spanish markets
COACHING	AI coaching — scalable from day one
SCIENCE	Gut-brain neuroscience + psychobiotics — the next frontier
CORE	Psychobiotic recipes mapped to mood + Food·Mood Index

Market shift · GLP-1 agonists (Ozempic, Wegovy) producing 15–20% body weight reduction are rapidly displacing behavioral weight-management apps. Noom's core value proposition is under structural pressure from pharmaceutical substitution.

Food·Mood operates in a different lane — emotional wellbeing and quality of life are not replaceable by a prescription.

Six theories. *One product.*

Food·Mood is not built on a single theory. It is an interdisciplinary ecosystem where six established frameworks converge — each one mapping directly to a feature of the product.

EMOTIONAL PALETTE + GRANULARITY

UMBRELLA FRAMEWORK

Affective Embodied Psychology

"The science of how your body builds your emotions — and how food can rewrite them."

Capital *discipline.*

87% of the round goes directly to product, growth, and validation. Operations includes founder minimum salary of €1,500/month. Full compensation normalised at Seed stage.

Product & Tech AI coaching, content engine, delegate development	€50,000	36%
Growth & Marketing Paid acquisition, PR, community amplification	€35,000	25%
Scientific Validation Pilot studies, advisory board, evidence base	€20,000	14%
Operations & Founder Salary €1,500/mo founder salary + fixed costs	€35,000	25%

From *built* to *scaled*, in 18 months.

Round expected to close H2 2026. Dates relative to funding close.

Series A horizon (not factored into this round): at 10,000+ active users, GDPR-compliant aggregated behavioural data — correlating food, mood, hormonal phase, and habit — becomes a licensable asset for public health research and nutraceutical innovation. The dataset Food·Mood is building has no equivalent in Spanish-language women's health.

Sf

Susana Ferreras Diez

FOUNDER & CEO · FOOD·MOOD

- Psychologist
- MSc Food Biotechnology
- MSc Gerontology
- Full-stack developer
- Author · 2026

Creator of a kombucha brand and gut-health practitioner. **Built the entire Food·Mood MVP herself:** Next.js, Supabase, Stripe, Vercel. Author of *"Food·Mood: El placer de estar bien"* (2026, pre-publication).

A co-founder partner handles administration, operations, and compliance — mitigating bus-factor risk.

"This is not a founder who hired a team to build her vision. This is a founder who is the product — the science, the code, the content, and the community."

Built. Tested. *Pre-launch by design.*

✓ **MVP fully built and live** at food-mood.app — payments integrated, content stack ready, infrastructure tested

✓ **Intentionally pre-launch** on users: scaling starts after close, to do it right — not to chase messy early traction

✓ **Active community** via newsletter + WhatsApp & Telegram channels — warm audience ready to onboard

✓ **Book written** (pre-publication 2026); 7-episode proprietary audio library complete

✓ **3 transformation challenges live**; 5 more in pipeline — all 8 ready by Q1 2027

✓ **Demand validated** through founder coaching practice and Umyko wellness community (paying clients)

→ **First investor matchmaking event** — June 2026. Post-close metrics target (90 days): 100 paying users · D7 retention >40% · NPS >50

Full *transparency.*

The #1 real risk is founder time — which is why the use of funds includes €50K in Product & Tech to delegate development and free the founder's time for growth and content.

RISK	PROBABILITY	IMPACT	MITIGATION
Founder burnout	MEDIUM	HIGH	Co-founder alleviates ops; hire #1 technical planned for Q1 2027
CAC higher than €40	MEDIUM	HIGH	70% of growth budget on organic/community/PR; paid only as accelerator
Subscriber churn >10%/mo	LOW	HIGH	Challenge-first model pre-qualifies high-intent users; Food·Mood Index drives engagement
EU Digital Health Act restrictions	LOW	MEDIUM	GDPR-first by design; no medical claims; clear disclaimer
Big Tech Spanish localization	LOW	MEDIUM	18–24 month content head start; dataset as long-term moat

MOAT 1

Spanish-language scientific content — 18–24 mo head start

MOAT 2

The founder as product — authenticity does not scale easily

MOAT 3

The Food·Mood Dataset — licensable at 10,000+ users

A bet on the beach they left *empty*.

"Noom built a \$3.7B company serving English-speaking women who want to lose weight. Food·Mood is building the first company for Spanish-speaking women 45+ who want to feel better."
